About Me

With me you get the best of both worlds because I am a visual designer who has turned into a creative user-centric, front-end developer. Since I am very passionate about CSS, I can create beautiful responsive websites and apps. I enjoy injecting positive energy into any team I have the opportunity to work with and I thrive on learning from people with different skill sets. I am fully invested in becoming a better problem solver and improving on my programming skills.

Skills / Tools

HTML | CSS | JavaScript | JQuery | ReactJS | Git |
Design | Typography | Adobe Illustrator | Adobe Photoshop |
Adobe InDesign | Adobe Bridge

currently learning

NodeJS | VueJS | Adobe XD

Education

Aug 2019 - Feb 2020

**Software Engineering Immersive
General Assembly** - Sydney, Australia

Sep 2018 - Nov 2018

**Front End Web Development
General Assembly** - Sydney, Australia

2008 - 2009

**Small Business Management
South Western College, TAFE** - Sydney, Australia

2003 - 2004

**Diploma In Graphic Design
St George Design College, TAFE** - Sydney, Australia

Projects

3 Apr 2020 - 5 Apr 2020

Superheroes

Stay Home Hack - first remote hackathon

Technologies used: Miro | Figma | Adobe Illustrator

With a team of UX designers we created a platform that enables meaningful connections and professional resources for job seekers. I personally created the branding for our app proposal, worked on the wireframing, and executed interviews for research and data gathering.

Letter-Jumble

ABC learning made fun

This app's objective is to help parents teach the alphabet to their young children, while spending quality time together. My niece was able to learn the entire alphabet in only 2 days by using this app. Technologies used: ReactJS | react-sortable-hoc | Adobe Illustrator

Sweets To Go

Dessert Ordering app

This was a group project with the aim to produce a full stack fun food ordering app.

I was able to design and develop the front end.

Technologies used: ReactJS | React Styled Components | CSS
